Hi Eric-

It was good to see you and some of the team down in Portland last week. Following up on the meeting and your message, attached is a short summary of my thoughts on analysis looking at PRG's, spatial scale and AOPC's or SMAs. I think the GIS tools exist to do this analysis and it's a matter of planning with the proper eco and hh folks to prepare the analysis (ensure scope is correct and questions are posed)- which should not be terribly time intensive- and then sitting down and reviewing and summarizing together so that the team is better informed (and can ask more questions).
Thanks Eric-
Ben
